Civil defense has worked profusely
on the mystery of the 'Beep Beep' last
year. A meeting was held here with
civil defense AND AN owl expert from
Hof W. They did not say it was AN
owl. We are sure that you might be

Dedicated to the survivors of the "Beep Beep".

This is the story as my husband and myself know it and observed together.

Both objects were very clear and very, very low. The only difference in our opinions due to perspective is that my husband thought the object was much larger than the airplane and I saw it as smaller, about 3/4 the size of the plane. There was a terrific noise, but only one motor noise from the airplane, as a very low flying airplane would emit. The airplane was an older type plane and as Mr. Nelson said much like an older c-47. (newspaper said b-49) It was OD color, illuminated by the lights of the other object, they were so close to each other we thought they were going to crash, we did hear metal clanging together but whater it was this sight or now we do not know. Neither object was jet propelled, they both flew as a low flying, slow flying airplane would fly, the airplane was like an old world war 11 bomber with big motors, a very heavy built airplane, not jet or streamlined such as our boeing models are. The object was shaped round on the base, at least it appeared to be because of the lights, it had a beautiful silvery dome, much like the diamond in a ring, not a dark silver, as one man described, "almost like glass". It had huge lights, on the front green, on the back red and on the dome amber. It was beautiful and we will not say it was from outer space, it could have been made by us. It was rare and unusual but not impossible. After this object disappeared from our view, two fast flying airplanes within minutes apart and low, flew in the same direction. There seemed to be many airplanes in the area afterwards and we are convinced that this airplane was so close to the object that they had to see it and what was in it, if there was, they just had to.

Afterwards, we heard a loud crashing noise and observed glowing light coming from the direction of the lake, which is one half mile from our home, this was very eerie, but could have been anything. It is this lake area in which most people have observed these objects. The following night two of these objects

Please Return

were observed by my daughter and myself at a much greater distance but recognized by the strange and tremendous lights .

These objects have been reported at least once a night by somebody within this mile and a half area until the weather turned cloudy and rainy last Tuesday

The objects are frightening the people and causing mass concern and the children are becoming hysterical because of the sights and the movies of the monsters from outer space.

We know there must be some logical answers to this and are hoping that we can be put at ease . We can only say, "we have seen it, we believe it" whatever it is

We are hoping for a resolution and also that we may get to observe this once again

Sincerely

Mr. [REDACTED]

Dear Sir:

We received your reply and information and we were very glad to hear from you.

In haste we lost your letter but will try to answer the best we can.

It has been such a summer that you nor anyone else would find it easy to believe and so we hesitate to discuss this summer with a lot of people. Things happened and were witnessed by several people almost every evening and it could almost be impossible to go into minute detail of dates ect. it would have taken a catalogue to keep the records and we finally gave up. We are considering, taping the information from various witness's to this phenomenal summer and then typing up a complete report. We are waiting for a tape recorder. We don't even know who would be interested in this besides ourselves but I can tell you that no person we talked to or were grouped with could tell as many fantastic lies as it would take to discuss these things.

First we observed our own incident and then each night we would watch moving

lights across the sky from our own roof top. Perhaps a few of these were satilights but when you count up to 12 and 15 within the time span of 2 hours it seems ridiculous to suggest that these were all sattalights and more ridiculous to suggest these were airplanes when there was no sound involved and since we have observed that we can hear any airplane that we can see from our positions. Well what were they? Airplanes? We observed two radiant round balls flying very very low, east, south from our home extremely brilliant and so low you could actually see moving machinery within the brilliant light, it gave the illusion of being perfectly round. We saw one that tumbled barely higher than an airplane flashing several colored lights. apparently the pilot of the airplane did not get excited because he kept steady on his course. I can't remember whether we told you about the fantastic incident of the mountain jeep trip we took. It was hilarious and frightening at the same time and I will try

to tell you exactly what happened. My brother became interested in these crazy lights and the crazier actions that were taking place. and we spent several evenings with him chasing these things in his Jeep, since and because of the strain of these wilderness trips the Jeep has lost an axel and ^{is} out of use. But one evening we decided to find a road to the top of the highest mountain peak so that we could watch for lights. We finally arrived at a forest rangers station. and from there we could see a higher peak and on the tip ~~tip~~ we could see what looked like domes and antenna's and we decided to adventure and see what we could see. We followed a road, one way width, very rutty and wet and hard to get through but we finally made it. Mind you none of this property was government posted nor were there any fences no keep out signs no gates no nothing. This ² top of this road was at approx. an 80 degree angle straight up. My brother parked the Jeep about half way up because we were afraid that we could not turn around to come back down. The three men got out and with a small flashlight they walked up the hill, a few minutes passed and finally we saw all three of them running like son of a guns down the hill toward us. Now we thought they were being silly and trying to scare us four women in the car and we were getting a big kick out of it until they got in the Jeep and whitefaced they were not saying a word they just hustled that jeep out of there and away we went. Finally they calmed down and told us their story. They had arrived at the dome shaped structures and as they were flashing their light around they heard a crazy voice, as if it were on a record player on a very fast speed say "Can't talk now someone's coming" and then they heard a Click Click Click.. as if switches were being snapped off. Well it scared the ~~he~~ck out of them and that is when they started running. Mind you by this time it was pitch black out and they could see nor hear no one or no thing.

The next day we started out earlier and decided that we going to return there and see what we could see in the daylight. It took us two hours from the bottom of the hill to get to the top of the hill in broad day light. We saw this

there was no sign of life. there were no fuses in the fuse box there was no machinery in operation. There were no signs. inside one of the domes there was a handwritten sign that said this property stolen from somebodys garage in snohomish. It was'nt scary in the day light and looked as if it were a t v relay station or something. I called every one that we could think of that could verify that there was something there and no one would admit to it. One engineer asked me what time of day it was and I told him it was 10:30 at night. He said, 'are you crazy?' and hung up. Well you can see why we were and are afraid to mention to many of these things to the wrong people. Ok You tell us what it was and what it is and we will be satisfied that we are a bunch of nuts that were looking for some excitement (to fill up the emptiness of our lives.) that has been suggested by people that cannot take the time to look, listen. or hear.

The next interesting thing that I can think of was "The star that stood still". My nephew, my self a 20 year old neighbor girl and our daughter were sitting on the roof scanning the skies we watched this brilliant star for at least 2 and 1 half hours when much to our surprize and right before our eyes it began to fly away. It traveled east toward ~~one of the tree~~ peaks of the mountains that we can see from our roof. It appeared to fly around the mountain at least it would disappear and reappear at various

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.

20. Do you think you can estimate the speed of the object?

(Circle One) Yes No

IF you answered YES, then what speed would you estimate? Slow Moving Airplane

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes No

IF you answered YES, then how far away would you say it was? from 1000 to 40 feet

22. Where were you located when you saw the object?
(Circle One):

- a. Inside a building
- b. In a car
- c. Outdoors
- d. In an airplane (type)
- e. At sea
- f. Other from window of house

23. Were you (Circle One)

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

It was completely different than anything ever observed by Mr Nelson or myself. We since have observed several UFO photos that resemble it

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you first saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you last saw it. Place an "A" on the compass when you first saw it. Place a "B" on the compass where you last saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there?

Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

in Special Street.
 Strangest of all were the lights. They were brilliant and yet there was no eye strain it was as if you could see through them. Could actually see rotating coils in center of the flare. The lights because of the action of motion did flare. As the object flew away it resembled more a 'Pulsating' light. It actually did not pulsate it flared. Lights stood on base and away from object. Small base was dark. The lights, did not light up the object so the object was very dark except the lights and the dome. We could not see outline of object but due to the place next to dome and lights we reason the shape was round and since we did not see the dome until the object banked from the plane we reason the object was shaped as an inverted saucer

 actually could not see a connecting

Second Mystery: window under
 dome was definitely glass. dark in
 color, as an undraped window in
 the day time (outside looking in) I
 watched for movement of a pilot (or
 anything). It is like trying to explain
 a 'one way window' I could not see
 through the glass. I remember being
 very irritated that I could not. We
 would like to say the object was
 logical (American made) we cannot.

From our study since we
 have determined object was definitely
 an ufo. we do not know, however,
what it was and are waiting patiently
 for a serious explanation.

Would appreciate it.

BEEP-BEEP-BEEP**Lights, Sounds,
Actions—U. F. O.'s
Turn Terrifying**

By DON DUNCAN

Beep-beep-beep.
Insistent. Spooky.

Residents adjacent to a small wooded area near Lake McDonald, six miles east of Renton, heard the sound last night. It has been going on for several weeks at least, they say.

A new dimension was added several weeks ago. Besides the beep-beep-beep, there were flying objects. Last night there was a red fireball that streaked across the sky while a trio or so persons gathered on the back porch of the James Nelson home, 13612 196th Av. S. E., Renton.

SKY WATCHERS said the fireball was preceded by the drone of an airplane engine. But the luminous red light, distant and fleeting, hardly compared with other things seen and heard in recent weeks.

Kay Remillard, 20, said she saw four strange, glowing objects in the sky. And a 13-year-old girl reported seeing two objects in the sky. Both were badly frightened.

But it was the Sunday-night experience of the Nelsons that brought neighbors to their porch last night. They could talk of little else.

The beep-beep-beep had picked up in speed and volume around midnight Sunday. Neighborhood dogs began to howl mournfully and to bark.

MRS. NELSON went to her window and opened it.

Beep-beep-beep.

Then she heard another noise — "like a swoosh-swoosh, like iron clinking and wood breaking." Then she saw an airplane.

"And then," Mrs. Nelson continued, "I saw some other lights through the trees, moving. I thought it was the airplane. It broke into view. It was not the airplane. I called my husband.

"We stood and watched the airplane and this object. From a distance the object dwarfed the airplane, as if you had put a basketball beside an orange."

NELSON, A. Boeing Co. machinist, verified what his wife had said, but added his own thought that the airplane was "an old B-49 (a Northrop 'flying wing') and it seemed to be fighting with the strange object—at least it looked that way; but just as they were about to collide, the airplane banked and pulled away."

The Nelsons said they watched the object hang in the sky for about 15 minutes, its lights pulsating. Then two more airplanes approached it, "as if they were following it."

And then it was gone. And all that remained was the woods and that persistent beep-beep-beep.

Dear Sirs

There ARE SO MANY things to
tell about our "UFO summer" you
could not ^{possibly} go into detail. There are
MANY witnesses of other sightings
AND SO MANY mysterious things seen
by MANY reliable witnesses AND ourselves
in this area.
Things observed April 66 thru Oct 66.
It would take me days and days to
copy things for you we have.

You would also think we were
a bunch of nuts if you listened to the reports
I can assure you we are most sincere
with each sighting and try to detail
exactly

I have written several articles (unpublished)
for how do you end without an explanation
We have learned the hard way
